

The expanded fleet is shaping up!

We've been working on the Vespoli 4+ donated by the University of Oregon.

Erwin has been tightening all the bolts and nuts, changing worn pieces, replacing parts with the ones we got from Gonzaga and just doing basic maintenance. In the next few days we will be receiving the replacement rib so that it can be installed together with some other missing and worn pieces that were ordered from Vespoli.

Take a look at this beauty, named YAM-PAH-PA which is one of the native American names of the Snake River.
